Subject: 2013 QAP

Dear Mr. Farmer:

I apologize for the lateness and brevity of my remarks. I imagine that you will receive valuable input from others related to the disadvantages accrued to public housing redevelopment projects based on distance from existing amenities. I send this email simply as confirmation of support for consideration of the "2-mile waiver" for existing properties, especially those served by public transportation. Such properties may not achieve the amenity scoring level awarded to a "greenfield" development site, simply based on the availability of un-developed land.

Thank you for your consideration.

Sincerely,

Joe Morris, AICP
